

## 劉雨柔 心得:

My internship started at October 3, 2023 to March 4, 2024 at Ube Technical College. I helped Ms. Okada assist the English class for two semesters in 2S, 2B, and 2C. Also, I participate the homeroom class in 1S.

During the third semester, we used "Dual Scope" this textbook to teach grammar. Except the grammar skills, the teacher also provided the conversation practices before the class and the review activities afterward. My role was a teaching assistant to help students and explain some questions in easy English.

For the fourth semester, "Big Dipper" was the textbook. It focused on expressing in English. The teacher followed the contents and students needed to complete worksheets. In the end of the class, we collected one worksheet and gave some response. In addition, we taught lesson 5 and lesson 13 by ourselves. It was the best way to enhance my teaching experience.

Mila and I provided two activities in 1S homeroom class. First was Taiwan National Day on 10/10. Another was the food kingdom activity. We introduced the Taiwan and world cuisine. Everyone had a good time.

During this period, I was not only work but also engaged a lot of school events. For example, Ube festival and the school sports day. The school also took us to Hiroshima and Miyajima with Japanese students. I learned a lot about cultural things here.

Every Monday afternoon, we had lecture club. Not only Japanese students taught us Japanese but also let the exchange students share their country or culture. For example, we shared the Chinese calligraphy and Malaysia students taught us basic Malay language. All the people were so kind and friendly.

It was wonderful to look back to this internship. My teaching experience and cultural immersion were improving. I am grateful for all the teachers and students' support. All the memories will keep in my mind forever. Learning is not going to stop. I will keep learning and be a good teacher in the future.
